THE SPECIALIST IN MOBILITY LIFTS • TRUSTED FOR OVER 50 YEARS

Why choose Terry Lifts?

In 1968, the owner of a small engineering company in the town of Knutsford, Cheshire, our founder Eric Terry, helped a local family who were struggling to get their mother upstairs.

He achieved this by designing the very first hand wound domestic lift. His invention became the talk of the community and word soon spread both at home and abroad.

Over 50 years and more than 20,000 lifts later, the committed people at Terry Lifts continue to listen to the needs of their customers who are embracing life's challenges. Our designers, engineers and production operatives produce lifts for every need and every situation, domestic, public access, in the UK and for export markets.

Our Lifestyle Homelift is an exceptional example of British engineering, designed for comfort, quietness and your convenience. Made entirely in our Cheshire factory using only materials of the finest quality, it enhances properties of any size and style with its chic design and elegant lighting.

The Terry Lifts team ensures that all products comply with the relevant safety standards. Our skilled workforce finishes the Lifestyle Homelift with amazing bespoke touches ready for delivery and installation into your property.

This is what makes our Lifestyle Homelift so exclusively different.

Making life **EASY**

Stylish

Our stylish Lifestyle Homelift has been designed by our team of experts to make your life easier.

Created specially for the home, it is elegant and compact and will fit neatly into rooms of all sizes, practically anywhere you choose. It can even be custom made to suit your décor.

The Lifestyle Homelift will future proof your home so you don't have to worry about the emotional stress and upheaval of moving house if the stairs become too much.

Key benefits

- Safe and reliable hydraulic drive system
- A low cabin floor profile, less than two inches, makes it easy to step into the lift
- One-touch controls. No need for constant pressure to the controls
- Fire and Smoke Protection as standard to ensure fire safety
- Safety glass vision panels which will not scratch or discolour
- Bluetooth landing controls making it easy to decide on wall control location
- Smart corner design minimises the lift footprint
- No lift shaft required minimises the space required for the lift
- Quick, no mess, no fuss installation
- Designed and manufactured in Britain

Quality comes as STANDARD

As standard, the lift is fitted with laminated safety glass which is scratch resistant and far stronger than cheaper alternatives.

Tasteful and elegant, enjoy these premium features with your Lifestyle Homelift.

To ensure the quality and reliability of every lift, we assemble all component parts. Door locks, printed circuit boards, hydraulic pumps and rams are rigorously tested in-house before they leave our factory.

The lift uses Terry Group designed bespoke electronic control systems.

Each lift is fully tested when the installation is complete, following which, a test certificate is issued which supports the warranty.

Peace of **MIND**

At Terry Lifts, we have combined luxury with the latest technology, making our new Lifestyle a top of the range lift of the highest quality.

Your safety is our primary concern. It is important that you feel safe and secure when you are using your Lifestyle Homelift, we have:

- Fire protection between the upper and lower floors, whether the lift is parked upstairs or downstairs, to the requirements of BS5900: 2012
- UKCA and CE marked to conform with the Machinery Directive
- Building control approval obtained for every installation
- A load capacity of 250kg (39 stone)
- 12 month warranty
- Manual lowering function and battery back-up allowing in-car lowering to the ground floor in the event of a power outage, so lone occupants can use the lift in complete confidence
- Dedicated aftercare support team to assist you with using your lift

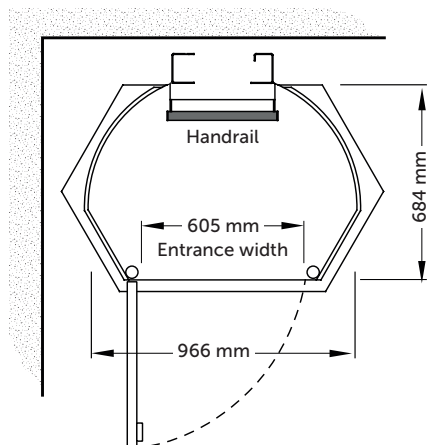

Pressure sensitive safety surfaces stop the lift if obstructed from above or below

♦ Internal car width: 854mm

♦ Internal car depth: 597mm

♦ Maximum travel: 3.6m

♦ Minimum ceiling height to the upper level: 2250mm

Frequently asked QUESTIONS

Is it possible for the lift to stop between floors when I am on my own?

In the unlikely event that a power cut occurs at your property, the lift's main batteries will maintain control and lower the lift safely to the ground floor. If this system fails, our unique in-car Auxiliary Battery Lowering will take over. This works in the same way as the main circuit but isolates any potentially faulty operating circuits without compromising the safety of the user or other occupants within the property.

Should both systems fail, with assistance, a manually operated lowering system can be activated from outside the lift to bring you safely to the ground floor.

For added reassurance, our lift can be equipped with an in-car telephone, connected to your property's landline.

Can I use my wheelchair in a Lifestyle Homelift?

No, however, we have designed the Harmony and Harmony FE lifts in collaboration with our customers to meet the requirements of a wheelchair user or an attended wheelchair user. Illustrated on the back of this brochure.

Does Terry Lifts manage the building work?

Yes, we can complete all building work or alternatively, we can provide a Specification Guide to your builder. The choice is yours. Normally, no major structural work is required.

How much space does a Lifestyle Homelift require?

The footprint of the Lifestyle Homelift is smaller than that of a typical armchair. Please refer to size diagram above or we can provide a footprint template to position in your home.

Is the Lifestyle Homelift safe in the event of a fire?

The Lifestyle Homelift is fire and smoke test certificated by an approved and accredited test laboratory and complies with BS5900:2012 in relation to through floor lifts. This covers fire safety for the Lifestyle Homelift in both the lower and upper position.

I plan to keep my lift for a very long time, will Terry Lifts service and care for my lift?

Yes. Terry Lifts can provide a service and maintenance package to suit your requirements. Please contact our aftercare service team to discuss options that are available.

Can installing a Lifestyle Homelift be cheaper than moving home?

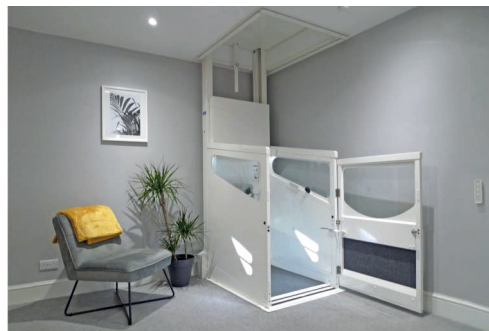

Yes, almost certainly. We are often told by our customers that it was cheaper and less stressful than moving home.
