

MR & MRS KAPADIA

A Perfect Fit

Location: Pitstone, Bedfordshire
Client: Mr & Mrs Kapadia
Lift Installed: Lifestyle Home Lift

The Project

Mr and Mrs Kapadia contacted Terry Lifts in search of a solution to help Mrs Kapadia get up and down the stairs in their house more easily. Mrs Kapadia suffers with knee problems and, not wanting to move house, she needed a practical solution to help her move more easily between floors. A stair lift was not an option due to their very narrow stair case. And limited headroom meant that larger home lifts were ruled out too. The Terry Lifestyle Home Lift was exactly what the Kapadia's were looking for – an attractive space-saving solution with a small, neat footprint.

Challenges

After the initial survey it became apparent that this would not be a straight forward installation due to the very limited headroom in Mr and Mrs Kapadia's house. Every mm was important so there was no room for error. It was concluded that the Lifestyle lift could be installed, albeit rather snugly!

Solution

Thanks to its space-saving design and small footprint, the Lifestyle lift offers Mr and Mrs Kapadia not only a practical solution, but also an aesthetically pleasing one. The preparatory work and installation was completed carefully by Terry Lifts' engineers within three days and they demonstrated the lift to Mr and Mrs Kapadia and handed it over.

Solution

Mrs Kapadia has recently undergone a knee operation and has found the Lifestyle lift to be invaluable in maintaining the freedom in her home during her recuperation.

"I'm not sure how I would have coped since my operation without the Lifestyle lift. I wouldn't have been able to get up and down the stairs without it. Thank you to your team of staff who have done a fantastic job, especially during the installation, which was handled professionally and with minimal disruption." **Mrs Kapadia**

Product Information

- Space-saving with a remarkably small footprint for a lift that can carry 2 people with a 250kg capacity
- Manufactured in the UK, meaning short lead times and reliable national service & spares support
- Practical & affordable alternative to moving house if the stairs become too much
- Stylish & elegant with customisable features and finishes to suit the customer
- Can be fitted neatly into a corner or against the wall
- An attractive & less obtrusive alternative to a stair lift
- No lift shaft required so easy installation with minimal building work
- Independent certification to BS 5900:2012 and the Machinery Directive above 3 metres
- 30 minute fire protection between floors whether the lift is in the up or down position - an essential safety feature for a through floor lift
